

## Neuro-agility Profile™ Licenced Practitioner

Online Accreditation Programme

### Help individuals, teams and organisations become more agile

Are you supporting people and organisations going through **change and transformation**? Helping people become more agile means improving their thinking, ability to innovate, learn and perform better, whilst also enhancing their health and wellbeing.

### Become an Accredited Practitioner and lead the way in neuro-agility impact

Increasing, **measuring and tracking** the agile brainpower of every individual, leader and team helps reduce the cost of change, enabling people to **think faster and more innovatively, learn faster and perform better.**

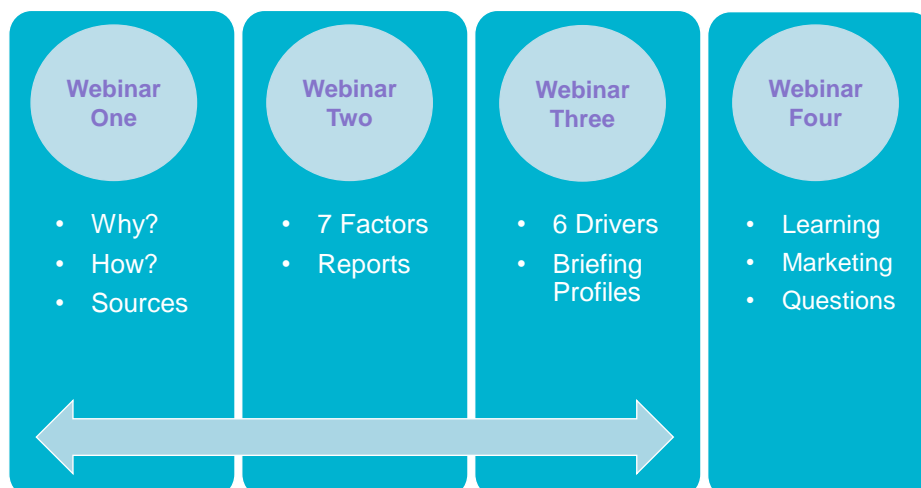

**The Neuro-agility Profile™ Advanced+ assessment** is a multi-dimensional, neuroscientific brain profile assessment. It describes a person's unique neurological design, explaining how they learn and think. It assesses 6 drivers that impact brain performance, which enable people to enhance their performance and agility.

The accreditation certifies **coaches, HR, talent, L&D and performance improvement professionals** to assess and debrief people and teams on their unique neurological design (potential) and the drivers that optimise their brain performance and brain health.

## 7 benefits of improving brainpower:

1. **Improves individual and team performance** - improving brain fitness helps people work faster and smarter, so they achieve their goals more productively
2. **Develops leadership and change management skills** - problem-solving, critical thinking, and creativity. Based on accurate understanding of their neurological design, leaders and managers have a clearer understanding of how uniquely they deal with change, solve complex problems, think, learn, serve, influence, and inspire
3. **Promotes a learning culture** - helping improve people's ability to learn faster, concentrate and remember, sustainable advantage for the future.
4. **Improves emotional intelligence** - providing a predictive analysis and accurate awareness and management of their neurological design
5. **Enhances wellness, health and safety** - helping manage stress, fatigue, identifying and minimising risk for human error, reducing accidents and promoting workplace happiness
6. **Improves talent selection and recruitment** - helping you align people's neuro-design with the jobs they do more effectively
7. **Boosts engagement** with people having an accurate understanding of who they are, how they fit in and can best contribute.

## Your accreditation programme consists of the following:

## Your accreditation programme consists of the following 10 steps:

1. Complete your **own Neuro-agility brain profile**
2. Interactive zoom **webinar one** (90 minutes): **Welcome introduction**, getting to know each other, an introduction to Neuro-agility and explanation of how to get the most out of the accreditation learning process
3. Self-study, online video learning
4. Interactive zoom **webinar two** (90 minutes): **Understanding the brain** and exploring the flexibility of 7 factors of a person's neurological design
5. Self-study continuation of online video learning
6. Interactive zoom **webinar three** (90 minutes): **Knowing how to boost the 6 drivers** of brain performance
7. Self-study continuation of online video learning
8. Interactive Zoom **webinar 4** (90 minutes): Interactive **practise session** de-briefing a variety of Neuro-agility profiles, opportunity to explore marketing and any outstanding questions
9. Self-study and **confirmation of learning assignment**
10. Membership of FPG's **Neuro-agility Practitioner's community** for continuing professional development

### Self-study learning

Once you have signed up to do the accreditation, you will receive a link to access a series of videos and your Neuro-agility downloadable workbook. During **webinar one** the content of this self-study learning will be explained to you in more detail. Throughout the accreditation you will work your way through 14 self-study modules, including 33 videos (total of 23 hours, approx.).

“As a coach I am convinced that a deeper self-awareness and self-knowledge supported by the scientific facts of the Neuro-Agility test help to set the focus for development and success. Neuro-Agility provides unique information and data to clients about the way their brain works, the way they learn best. When in our business world organisations are turning agile there is a role for us to support the journey of the individual towards agility and brain fitness to master learning needs and challenges with the constant change of the modern world”.

**Judit Ábri von Bartheld MA, MCC**

## Once you are accredited your potential income sources include:
